Carbon Footprint Calculator

Insightful businesses incorporate environmentally friendly practices to increase the company's productivity, profitability, and sustainability, as well as to reduce the negative environmental impact of daily operations. Use the Carbon Footprint Calculator to discover what effect your facility's operations have on the environment. The calculator provides an estimate of how much of your company's carbon footprint can be reduced based on certain proactive steps you can choose to lower your energy use.

To begin, select your state, nearest city, and then type of business from the drop-down lists. Benchmark data will be displayed. You will then have the option to calculate your specific carbon footprint and look at ways to reduce it.

Watch how your facility's carbon footprint decreases with each improvement!
