

Please describe your plan, include: (limit to 500 words)

- What will be placed in the exterior premises shown on the drawing submitted
- What will be sold in the exterior premises
- For restaurants, approximately how many people can be seated at one time
- What barriers or safety measures will be employed to keep customers, staff, and the general public safe from traffic and generally. At-grade Separation: The use of Jersey Barriers to separate vehicles and pedestrians/patrons at the same elevation (e.g., between the travel and parking lanes) is the City's preferred method. Applications proposing the use of other separation materials and methods should be submitted with any relevant safety data to be reviewed by the City.
- How foot traffic or bicycling through the exterior premises will be replaced or redirected if your proposal impedes existing sidewalks or bicycle lanes
- How the proposal ensures compliance with ADA requirements that will allow persons with disabilities access to or around the area, including the utilization of temporary ramps and/or platforms when necessary
- How the plan accommodates the interruption of transit service, if at all. Attach copy of notice to the Niagara Frontier Transportation Authority (NFTA)
- How the plan accommodates the interruption of emergency vehicle routes, if at all
- How crowd size and control will be monitored to ensure safe social distancing is observed, e.g., whether restaurant seating will be reserved or available for walk-ups, how queueing will be avoided
- Whether the proposal requires the City temporarily alter any speed limits or posting additional traffic control signage
- Any additional signage for marketing or operation of the exterior premises as indicated on the drawing submitted.
